# WHAT MAKES IDN CLINICIANS DIFFERENT?

**IDN clinicians are set apart from others by:**

- Utilizing advanced assessment techniques to evaluate the status of your nervous system providing important information on how your body will respond to treatment.
- They provide a whole body approach to your problem- so they will assess and treat important areas where your pain is as well as where it could be coming from.

**Your IDN clinician is specifically trained to help you manage your pain!**
